Amputee Sling

**Divided Legs
Reclined Position
Shoulder Height**

Model #25040
Polyester

Model #25140
Polyester Net

The Amputee Sling is a shoulder height model with divided leg parts. It features a reinforced back and is suitable for patients with double-sided or single leg amputations, patients with hip problems or patients with increased risk of sliding out of the sling. The Amputee sling is available in Polyester or Polyester Net fabrics.

Versatile

The Amputee Sling in Polyester fabric allows for fast and easy sling application making this sling ideal for most lifting situations. The Polyester Net fabric allows the sling to be used in a bathing or showering environment as well as for rehabilitation pools. A user of this sling must have good head control. The slightly reclined position helps prevent the patient from sliding out of the sling.

Extra Support

The Amputee Sling features a reinforced back and to offer additional support throughout the back area for those users with poor trunk stability as well as reinforced legs. The Amputee Sling can be used with or without an optional waist belt that is available in an assortment of sizes with a Velcro or buckle closure. The unique design offers the added benefit that the patient can have their arms inside or outside the sling, depending on their capabilities.

Easy Care and Easy Fit

Our slings are manufactured to the highest quality standards. They feature reinforced straps and high strength nylon webbing around the sling to make them strong enough to resist even the most active use. Each sling label is colour coded to ensure quick and easy selection of the correct sling and the straps are colour coded for easy determination of required positioning.
