Our Toileting Slings feature a wide, divided leg partition that enables fast and simple application for dressing and undressing during toileting or bathing. These slings are suitable for patients with poor trunk stability and feature padding under the arms for extra comfort and support. They are available in a low back model or a high back model with an adjustable neck support for increased head stability and are available in Polyester or Polyester Net for the low back model and Polyester Net for the high back model. All models can be used with an optional belt for added support.
