Optimal support

Our Columbus Sling E-clip is an oval sling, making it ideal for people who need full support, even under their bottom. In certain specific situations, this sling can certainly prove to be an egg of Columbus.

This sling provides comfortable support to the head, torso, thighs and even the seat, helping the client feel safe and secure. This sling is ideally suited to clients with limited core stability and/or a different center of gravity due to, for example, an amputation or because they wear a corset. The sling has a sewn-in seat, which means that the client can sit on the sling and will not have to wear leg straps, giving the client the sense of optimal support.

or a tendency to overstretch will not slip from the sling as easily. Thanks to the integrated, reinforced headrest, this sling can even be used to lift up clients from flat surfaces, such as the floor.

Soft Air Mesh™ is a lightweight, cool, soft and breathable fabric. with moisture-wicking properties, which means it draws moisture away from the skin through the fabric where it can evaporate quickly. Another advantage of this material is that it is anti-bacterial for improved hygiene. The sling has "two-way stretch" properties, making it feel almost as a second skin. Compatible with the mobile Diana II Comfort lift and Diana II 4 MSB.

Sitting back in a reclined position will reduce pressure on the client's leg, and this sling will help you do just that when used in combination with a four-point hanger bar. In a reclined position, clients with reduced core stability and/
